

**Cements Product Family Chart**

Product Name	Indications	Cement Type	Key Advantages
<b>Resin Cements</b>			
<p>RelyX™ Unicem Self-Adhesive Universal Resin Cement</p> 	<p>Permanent cementation of:</p> <ul style="list-style-type: none"> <li>• Ceramic, composite or metal inlays, onlays, crowns, bridges</li> <li>• Zirconia restorations (i.e., Lava™ Restorations)</li> <li>• Posts and screws</li> </ul>	<p>Self-adhesive resin cement</p>	<ul style="list-style-type: none"> <li>• Saves time by eliminating etching, priming and bonding steps</li> <li>• Proven to reduce post-operative sensitivity</li> <li>• Self-adherent and moisture-tolerant</li> <li>• Unidose capsule or Clicker™ Dispenser</li> <li>• RelyX™ Unicem Aplicap™ Elongation Tip makes cementing posts easier and more reliable</li> </ul>
<p>RelyX™ ARC Adhesive Resin Cement</p> 	<p>Permanent cementation of:</p> <ul style="list-style-type: none"> <li>• Porcelain-fused-to-metal (PFM) crowns and bridges</li> <li>• Metal crowns, bridges, inlays and onlays (high noble, noble and base metals)</li> <li>• Crowns and bridges with minimal tooth structure</li> <li>• Maryland bridges (resin-bonded bridges)</li> <li>• All ceramic/porcelain and pre-cured composite crowns, bridges, inlays and onlays</li> <li>• Endodontic posts</li> <li>• Adhesive (bonded) amalgam restorations</li> </ul>	<p>Resin cement</p>	<ul style="list-style-type: none"> <li>• Easy to use</li> <li>• Dispenses uniform, procedure-specific dosages</li> <li>• Easy excess removal</li> </ul>
<b>Resin-Modified Glass Ionomer Cements</b>			
<p>RelyX™ Luting Cement RelyX™ Luting Plus Cement</p> 	<p>Permanent cementation of:</p> <ul style="list-style-type: none"> <li>• Porcelain-fused-to-metal (PFM) crowns and bridges</li> <li>• Metal crowns, bridges, inlays and onlays (including prefabricated provisional metal crowns)</li> <li>• Zirconia restorations (i.e., Lava restorations)</li> <li>• All-alumina restorations</li> <li>• Prefabricated or cast posts</li> <li>• Orthodontic appliances</li> </ul>	<p>Resin-modified glass ionomer cement</p>	<ul style="list-style-type: none"> <li>• Clicker dispenser or Powder/Liquid</li> <li>• Low post-operative sensitivity</li> <li>• Sustained fluoride release</li> <li>• High fracture toughness</li> <li>• Paste/paste formula in the Clicker dispenser provides consistent mix ratios</li> </ul>
<b>Veneer Cements</b>			
<p>RelyX™ Veneer Cement</p> 	<ul style="list-style-type: none"> <li>• Bonding veneers fabricated of porcelain or composite</li> </ul>	<p>Resin cement</p>	<ul style="list-style-type: none"> <li>• Customer-preferred shading system</li> <li>• Try-in pastes offer excellent color match to final cured cement</li> <li>• Light-cure-only system provides excellent color stability</li> <li>• Easy to dispense, apply and seat; easy clean-up</li> </ul>
<b>Conventional Glass Ionomer Cements</b>			
<p>Ketac™ Cem Radiopaque Permanent Glass Ionomer Luting Cement Ketac™ Cem Aplicap™/Maxicap™ Permanent Glass Ionomer Luting Cement</p> 	<p>Permanent cementation of:</p> <ul style="list-style-type: none"> <li>• Inlays, onlays, single crowns, posts and screws</li> <li>• Orthodontic strips</li> <li>• Cavity linings</li> </ul>	<p>Permanent glass ionomer luting cement</p>	<ul style="list-style-type: none"> <li>• Chemical bond to enamel and dentin</li> <li>• Fluoride release</li> <li>• Extremely low film thickness optimizes marginal integrity</li> <li>• Radiopacity</li> <li>• Capsule delivery offers simple handling, consistent working characteristics and reliable quality</li> </ul>
<b>Temporary Cements</b>			
<p>RelyX™ Temp NE Temporary Cement RelyX™ Temp E Temporary Cement</p> 	<p>Temporary cementation of:</p> <ul style="list-style-type: none"> <li>• Provisional restorations</li> <li>• Crowns, bridges, inlays and onlays</li> </ul>	<p>Zinc oxide temporary cement</p> <ul style="list-style-type: none"> <li>• Non-eugenol</li> <li>• Eugenol</li> </ul>	<ul style="list-style-type: none"> <li>• Strong adhesion</li> <li>• Quick, easy excess removal</li> <li>• Optimal fit</li> <li>• Easy provisional removal</li> <li>• Available in both eugenol and non-eugenol formulas</li> </ul>
