RelyX™ Veneer Cement

Easy to use and provides excellent esthetic results.

For dentists who value esthetics, RelyX Veneer Cement provides excellent color stability.

The simplicity you want and reliability you need.

RelyX™ Veneer Cement combined with RelyX™ Try-In Paste from 3M ESPE, provide a simple and efficient way to perform veneer procedures.

Excellent color stability

The light-cure-only chemistry provides excellent color stability. Compared to competitive veneer cements, it is more stable which leads to better long-term esthetic results of the veneer restoration.

1At $\Delta E^*$ or less, color change is not noticed by human eye. 
$\Delta E^*$ values greater than 3.0 are noticeably different.
You’ll like the easy color match and easy handling of RelyX™ Veneer Cement

Easy to match

When tested against other veneer cement systems, the RelyX Veneer Try-In paste achieved the most accurate color match to the final cured cement.

Try-In Paste Color Match to Cured Veneer Cement

Translucent or transparent shades of various cements were tested for color match. [Source: 3M ESPE internal data]

1At ΔE* less than or equal to 2, color change is not noticeable by human eye.

What the experts say:

“I am extremely impressed with 3M ESPE’s resin cement system for porcelain veneer restorations. The viscosity is just the right consistency to allow the veneers to stay put for multiple placement. Additionally, the translucent shade is invisible to my eye after placement. This material also appears to be easier to finish and polish than other systems. I highly recommend this material.”

— John C. Cranham, D.D.S.
Founder, Cranham Dental Seminars
Faculty, Dawson Center

“RelyX Veneer Cement is simply exceptional. Unlike other cements that are runny or slump, the unique viscosity is light and fluffy. This makes veneer insertion accurate and clean up easy. I use the translucent shade roughly 95% of the time; however, when there is a need to slightly alter shade, the selection of water-based, try-in pastes is accurate and easy to use. For these reasons, I feel this is one of the best veneer cements on the market today.”
